### Standard Test Method for Accelerated Degradation of Polymeric Materials at Room Temperature<sup>1</sup>

This standard covers the accelerated degradation of polymeric materials at room temperature. It is intended for use by those who are interested in the long-term behavior of polymeric materials under conditions of accelerated degradation.

- 1. Scope**
- 1.1 This test method covers the accelerated degradation of polymeric materials at room temperature. It is intended for use by those who are interested in the long-term behavior of polymeric materials under conditions of accelerated degradation.
  - 1.2 The test method is intended for use by those who are interested in the long-term behavior of polymeric materials under conditions of accelerated degradation.
  - 1.3 The test method is intended for use by those who are interested in the long-term behavior of polymeric materials under conditions of accelerated degradation.

- 2. Significance and Use**
- 2.1 This test method provides the accelerated degradation of polymeric materials at room temperature. It is intended for use by those who are interested in the long-term behavior of polymeric materials under conditions of accelerated degradation.
  - 2.2 The test method is intended for use by those who are interested in the long-term behavior of polymeric materials under conditions of accelerated degradation.
  - 2.3 The test method is intended for use by those who are interested in the long-term behavior of polymeric materials under conditions of accelerated degradation.

- 3. Terminology**
- 3.1 **Definitions of Terms in This Standard:**
- 3.1.1 **Accelerated Degradation:** The process of exposing a material to conditions of elevated temperature, humidity, and other environmental factors to simulate the effects of long-term use.
  - 3.1.2 **Accelerated Degradation Test:** A test method in which a material is exposed to conditions of elevated temperature, humidity, and other environmental factors to simulate the effects of long-term use.
  - 3.1.3 **Accelerated Degradation Test Method:** A test method in which a material is exposed to conditions of elevated temperature, humidity, and other environmental factors to simulate the effects of long-term use.

- 4. Apparatus and Materials**
- 4.1 **Apparatus:** A test chamber capable of maintaining a constant temperature and humidity, and capable of exposing the material to the test conditions.
  - 4.2 **Materials:** The material to be tested, and the test specimens.

- 5. Test Method**
- 5.1 **Preparation of Test Specimens:** The test specimens shall be prepared in accordance with the requirements of the test method.
  - 5.2 **Exposure of Test Specimens:** The test specimens shall be exposed to the test conditions for the specified period.
  - 5.3 **Measurement of Test Results:** The test results shall be measured in accordance with the requirements of the test method.

- 6. Test Results and Reporting**
- 6.1 **Test Results:** The test results shall be reported in accordance with the requirements of the test method.
  - 6.2 **Reporting:** The test results shall be reported in accordance with the requirements of the test method.

<sup>1</sup> This standard is part of the ASTM D924 series of standards for accelerated degradation of polymeric materials.

HFD 10 Codes 1960s to 1980s
10-1 – On the air
10-2 – Off the air
10-3 – Standing by
10-4 – Message received
10-5 – Repeat message
10-6 – Arrived and investigating
10-7 – Minor fire
10-8 – Working fire
10-9 – False alarm
10-13 – Going to the Shop
10-14 – Returning to quarters
10-20 – Give location
10-28 – Call by phone
10-29 – Request police

ASTM STANDARDS FOR
