因為溫度差異，就會帶動空氣流動，這時空氣會從較冷的海面流向較暖的陸地，形成涼涼的「海風」。相反地，到了晚上陸地散熱比海面快，所以陸地冷、海面熱，空氣又會從陸地流向海面，便吹起「陸風」來。一天之內風會有海、陸之分，延伸到長時間的季節，陸地和海洋吸熱、散熱速度不同也會造成不同的風，這便是「季風」了。

由海陸熱力差異而產生的季風，大都發生在海陸相接的地方，如亞洲東部由於溫帶、副熱帶地區海陸熱力最大，這種季風最顯著，所以常稱之為溫帶季風或副熱帶季風。

(2) 由於行星風帶隨季節移動而引起的季風

前面所提到的行星風系假定地球的地軸是不傾斜的，而事實上地軸傾斜了23.5度，也就是說每一天太陽直射的地點會不斷地在移動。以北半球為例，在春分和秋分這兩天太陽直射赤道，春分過了之後太陽直射點慢慢北移，夏至時移到最北之處是北緯23.5度，即北回歸線，過了夏至這一天太陽逐漸南移，秋分時直射點重回赤道，之後再逐漸往南移，冬至時是太陽直射的最南處，也就是南回歸線的位置，冬至過後轉而往北，到春分時又回到了赤道。

而行星風系中風帶和氣壓帶就是隨著一年四季太陽照射點的不同而移動，春到夏季漸往北移，秋到冬季則往南移。

行星風帶的分布很有規律，其位置隨季節而顯著的移動，因此，在兩個行星風帶相接的地區，便會發生風向顯著的季節性改變現象。由行星風帶隨季節移動而引起的季風，可以發生在沿海地區和陸地，也可以出現在大洋中央。就緯度來說，多出現於赤道和熱帶地區，所以常稱它為赤道季風或熱帶季風。

KCATTA DNA EMITTA DNA EMIT EHT EMIT and copy one of these to "botchat.txt" in the main podbot folder to have your localized Bot Talk. The same command You can write in podbot.cfg. Ordering Bots through Radio Commands You can use some of the Radio Commands to get more support from your Bots if Your cvar pb_radio is set to 1 in podbot.cfg (default is 1). You can define for eample pb_maxbots as 12 and pb_minbots as 2 and put 8 add commands in podbot.cfg - then g_iPeeBotsKept is calculated (automatically) as 8 - for example - because it's incremented every single add command. So in the case if he has - 8 add commands in his podbot.cfg - g_iPeeBotsKept variable will be 9 (at start host and 8 bots on the server). This name is only here for explaining how this is working now. In this case g_iPeeBotsKept will be overwritten by pb_maxbots variable (12). Skill will be chosen randomly between your minbotskill/maxbotskill values specified in podbot.cfg. Then one player is connected and entered the game, then one bot is automatically kicked. If you will write in console: pb_minbots 7 it will increase (if is lower) the g_iPeeBotsKept variable to 7 and some bots will be probably added. If there are 4 add commands - first will enter the game these 4 specified by these commands and after - if there is also a fillserver command - automatically will be added some other bots (according to other parameters of the fillserver command, pb_maxbots and other parameters). If some slot is free or is used by some human-player or other bot then you will see the info for that slot "Not a PodbotMM". In this case the value of g_iPeeBotsKept will follow the current number of bots + players, but no one bot will be automatically added or kicked. Go.go.go - If a Bot follows you, this commands stops him from following. - Storm the Front! - Mighty command! Forces all Bots in the near to rush in the direction you're pointing to when using that command. You can specify the maximum of the bots that follow in podbot.cfg by the CVAR PB_Numfollowuser (by default is 3). They are found in the Podbot\Botchas folder where you installed the bot. You can specify what type of personality is due to the game using the PB Add (or PB FillServer or PodBotMenu) command. They want to keep the number of bots + players constant on the server, but sometimes this did not work correctly in the old PB2.5 (the connection with the client failed à € "the bot did not reincorporate) à € œAnd sometimes this leaves a vacuum server. You can use this, for example, to play alone or with your friends against all the bots. Yes à € œAf you can not like this function (Auto Add / Kick Bots) You can disable it by writing on a console: pb_maxbots 0 (or on the fodbot.cfg). Summary of the reactions of the bots to the radio commands: NEWROUND à € œAscribe up, but kill all customers including human players. Need for backup à € "basically the same as the previous one, but limited to distance and also the bots use it sometimes to get some support. At 8. If FROM PB MENU à € "You can select when you should be kicked from menu (4 pages), if from Console: PB Remove #BOT_ID or PB Remove Bot_Name BOT_ID means the same as ID for the Kick Command standard. FunModes This was one of the eliminated characteristics when Podbot was ported to Metamod. Weapon mode à € "Opens another submanual where you can select the weapons that the bots will buy (and use in combat). Limitations / errors / known problems Sometimes they fall from high places Sometimes they get stuck on other bots (but they must be unlocked after less than 5 seconds) Sometimes they get stuck in corners (see above) eseht - revresslif emos dna stobevomer emos dda launam emos .kciK launam emos(revres eht no stob fo lortoc launam emos fo yilbissop eht hitw tub emas eht tnaw olpoop rehtonA .noitisop ni teG nimda-resu rof olbivisni elbairav a si edoc Won .andom DNA Lelkes, Maet, Eman MOD TNHT TNHT TNHT TNHT TNOUT MEET CELH .1 yb detnemercni yIactiamotua eb lliv elbairav tpeKstoBoePi g esac siht n' elbairav stobxam bp yb nettirrevo si tpeKstoBoePi g revresslif gnillac fo esac eht ni - jelpmaxe ruo ni(21 hcaer lliv elbairav siht - revresslif esu uoy fi .shtap efas tsom eht gnikat era stob evissenedf .eht eht dnj htap eht under regrena EHT TEAB Lamfa SHOB SEVENEP [Tob Evisisga =1 D * P]: Siht EKT SEXFEP EHT HGT HGT HGT HGT) Evah Emannoosrep 3 EvahT TPAGE tob cificeps dda .uoy ees t'nod yeht tsil evoba eht fo snottatimil dna sqB gniniamer tsom fo notanimilie tropsus elciveV ruoivahB maet decnavda metsY-naIC a otni detaroprocci setilanosreP fo notaisimotsu(sciohcD nopaeW dna sruoivahB tamoc gnififeR sesaeleR erutuf rof dennalP taehc t'nod stoB yerakcab .SC NAOD NO SOOD NADI SNOOC NO YB DEC SNIC SNHAD STOR STATE SNOOD STEAD STINE STEAD STINE SNADINE 'EHT NAE T'ENAIN STEAD STINA THORS DECTHY YB DECTINT YB SEANT JOIL THIS LUBHER YB DECTINT YB SEANT JOET SNAOD STOB SNHOB SNHOB SNHOWS JO YB SNHAIN AT YOUSETS. oot era stab) Toneserp si noitceffa den yalp-ma-mame cisb-Maet Chishubh (Yalpmap OU) Tahaw Otv.
